PROFILE

Frontend-focused engineer building high-performance, scalable web applications with strong emphasis on UX and clean architecture. Experienced with React, Vite, and Tailwind CSS, focusing on responsive interfaces, performance optimization, and state management. Familiar with Node.js and Laravel for full-stack development and API integration. Passionate about writing maintainable code and continuously improving modern frontend architecture and system design.

EDUCATION

Bachelor of Engineering - BE, Tanta University 2019 – 2024 | Tanta

Studied core engineering and computer science subjects with a focus on software development, control systems, and computational fundamentals. Gained strong foundations in programming, algorithms, systems design, and problem-solving, alongside practical exposure to engineering mathematics and automation concepts.

SKILLS

Frontend: Html - CSS - Javascript - Typescript - Bootstrap - Tailwind CSS - React.js - Next.js - Redux Toolkit

Backend: Node js - Mongo db - Express-PHP - MYSQL - Laravel

Tools: Git - GitHub - VS Code - XAMPP

CERTIFICATES

THE WEB DEVELOPMENT CHALLENGER TRACK (UDACITY (Ministry of communications and information technology))

Building Web Applications using PHP & MYSQL (Mahara Tech (ITI Platform))

React: Creating and Hosting a Full Stack Site (LinkedIn Learning)

React JS (Mahara Tech (ITI Platform))

PROFESSIONAL EXPERIENCE

Frontend Developer, Mega Dev Software House 08/2024 – 04/2025 | Tanta, Egypt

Worked as a Frontend Developer building scalable and high-performance web applications using React and native JavaScript. Developed dynamic, reusable components and implemented modern UI/UX designs to enhance user experience. Collaborated with backend teams to integrate APIs and ensure smooth data handling across applications. Optimized performance, improved responsiveness, and maintained clean, maintainable code following best practices. Contributed to debugging, feature development, and continuous improvement of existing systems.

Frontend Developer (Freelance) 10/2024 – 03/2025 | Remote

Meeting Platform Project – Laravel & Blade

Developed and maintained the frontend of a web-based meeting platform using Laravel Blade, focusing on building responsive, user-friendly interfaces. Collaborated closely with backend logic in Laravel to ensure seamless data flow and real-time user interactions. Designed reusable UI components, optimized page performance, and implemented dynamic views for features such as meeting scheduling, participant management, and session tracking. Enhanced user experience through clean layouts, intuitive navigation, and cross-device compatibility.

Software Instructor, E-youth 06/2026 – Present

Delivered training sessions on core software development concepts and practical programming skills. Guided learners through frontend and backend fundamentals, including HTML, CSS, JavaScript, and modern frameworks such as React. Designed hands-on exercises and real-world projects to strengthen problem-solving and coding proficiency. Mentored students in best practices, debugging techniques, and clean code principles. Adapted teaching methods to different skill levels to ensure effective understanding and continuous improvement.

Frontend Developer (Freelance)

09/2026 | Remote

Dar Al-Hoqooq (dar-7qook | دار الحقوق لخدمات الأعمال) is a unified bilingual (Arabic / English) platform for company formation, legal, government, investor, wage-protection, premium-residency, consultant, and advisory services in Saudi Arabia. Customers can browse services and packages, order in one click via a saved request + WhatsApp handoff, and get help via FAQ, blog, and support center, while admins manage everything from a full control panel.

Dar Al-Hoqooq (dar-7qook | دار الحقوق لخدمات الأعمال) is a unified bilingual (Arabic / English) platform for company formation, legal, government, investor, wage-protection, premium-residency, consultant, and advisory services in Saudi Arabia. Customers can browse services and packages, order in one click via a saved request + WhatsApp handoff, and get help via FAQ, blog, and support center, while admins manage everything from a full control panel.

[NutraPeak](#)

09/2026

Built NutraPeak, a full e-commerce web application for a sports-supplements store featuring product catalog with advanced filtering and search, cart and 3-step checkout flow, wishlist, product comparison, deals with coupons, blog, and fake authentication with user profile, orders, and rewards. Implemented with React 19, TypeScript, Redux Toolkit, React Router 7, and Tailwind CSS v4 with localStorage persistence and fully responsive UI.

[TRANSRECIO](#)

07/2026

Neural acoustics turn your speech into perfectly punctuated text in real time — Arabic & English supported.

[AI-Driven Healthcare System](#)

Built an AI-powered healthcare platform using React and Laravel with role-based access for patients and doctors. Implemented authentication, doctor search, appointment booking, and dashboards, and integrated AI diagnostics for disease risk detection (diabetes, heart disease, tumors, skin cancer) with patient history tracking and doctor review features.

[Course platform](#)

An online course platform that allows users to browse a wide range of educational content, enroll in courses, and manage their learning progress through a personalized dashboard. The platform features a clean, modern, and fully responsive UI to ensure a smooth experience across all devices. It is built with a scalable front-end architecture designed for performance and maintainability, making it easy to extend with new features such as course tracking, progress analytics, and user engagement tools.

[RAG System](#)

An AI-powered chatbot that enables users to upload files and interact with their content through natural language questions. The system processes uploaded documents and provides accurate, context-aware answers based strictly on the file data. It features a clean and responsive interface that allows users to easily manage uploads and conversations. Built with a scalable architecture, it supports efficient text processing and retrieval, making it extendable for advanced features such as multi-file analysis, semantic search, and enhanced knowledge extraction.
